

Futura Plus

Hospital bed

Futura Plus

When reliability and versatility are important - both now and in the future

Futura Plus is a classic, having met the challenges of improving the quality of care for both the patient and the nursing staff. Futura Plus is a durable, multi-adjustable and accommodating family of patient beds, suitable for both hospital and nursing home use.

The various functions are planned to be as easy to use and as light as possible. The properties of quality and performance offered by Futura Plus have been repeatedly put to the test over time and have always met the most demanding standards.

The Futura Plus patient care beds offer adaptability and multiple features to ensure patient comfort in daily use. Futura Plus is equipped with many functions to make nursing tasks easier and providing the correct ergonomic working positions. The versatile range of accessories make Futura Plus an economical purchase.

- Economical purchase
- Functional construction
- Easy-to-use versatile adjustments
- Wide range of accessories
- Easy to Clean

User-friendly functions and fresh colours make daily nursing work a pleasure

Electrically operated mattress base adjustments offered with Futura Plus ease the load on nursing staff and ensure safe patient handling. Adjustments are activated from a hand-held control panel. Their operation is smooth and quiet to ensure patient comfort.

In addition, mechanical adjustments are also available. In that case the height of the bed can be adjusted hydraulically by means of a foot pedal. The manually adjusted back section and Trendelenburg adjustments are made using gas spring assisted hand levers. All of the adjustment pedals and control devices are within easy reach.

Futura beds are designed to be easily cleanable. Their appealing design and wide range of colours and materials will suit any patient care environment.

The handle for back section adjustment is within easy reach. A detachable handle for patient use is an option.

Hydraulic back section, adjustable according to patients weight, helps with lifting the patient

Hydraulic height adjustment, adjustment pedal on both sides of the bed.

Electrically controlled adjustments ease the nursing work while improving patient comfort.

Futura Plus

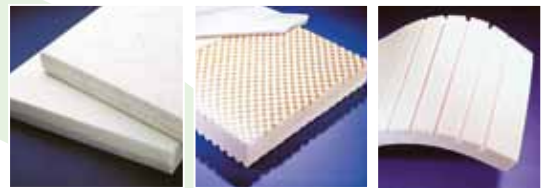

- Specially sized mattress base for children
- Reliable and versatile functions
- Adjustable mattress base height
- Functional construction
- Easy-to-use adjustments
- Wide range of accessories
- Easy to Clean

Merivaara's Futura Plus children's bed is equipped with all versatile and safe features of Futura Plus functions, only measurements have been changed to accommodate smaller patients. The Futura Plus patient care beds offer adaptability and multiple features to ensure patient comfort in daily use, e.g. the height is adjustable and offers safety and mobility. The versatile range of accessories make Futura Plus also an economical purchase.
